PDlink

PDlink is the next generation of power and signal distribution designed to deliver a truly unified and modular interconnect system. Leveraging decades of experience and innovation, Link combines LK connectors, eurocable hybrid signal and power cables for power, data, audio, speaker, and video distribution.

Constructed with heavy duty aluminium or extremely robust rubber (polyethylene), both versions are lightweight and easy to handle. The main and branch units support a number of standard configurations suited for amplifier, FOH, and video racks. The Socapex compatible 6 circuit units integrate seamlessly with your existing lighting distribution to easily extend power for peripheral equipment racks.

PDLink breakers can be just “magneto thermal” (MCB) or with residual current (RCB) too. Panels are laser labelled and can be custom labelled at a minimal additional cost.

Standard **PDlink** units are designed to seamlessly integrate with the **DGlink** Ethernet and signal distribution systems and can also be custom designed on request. Contact us to learn about PDlink. It can be offered as an OEM solution, or designed for your specific touring needs.

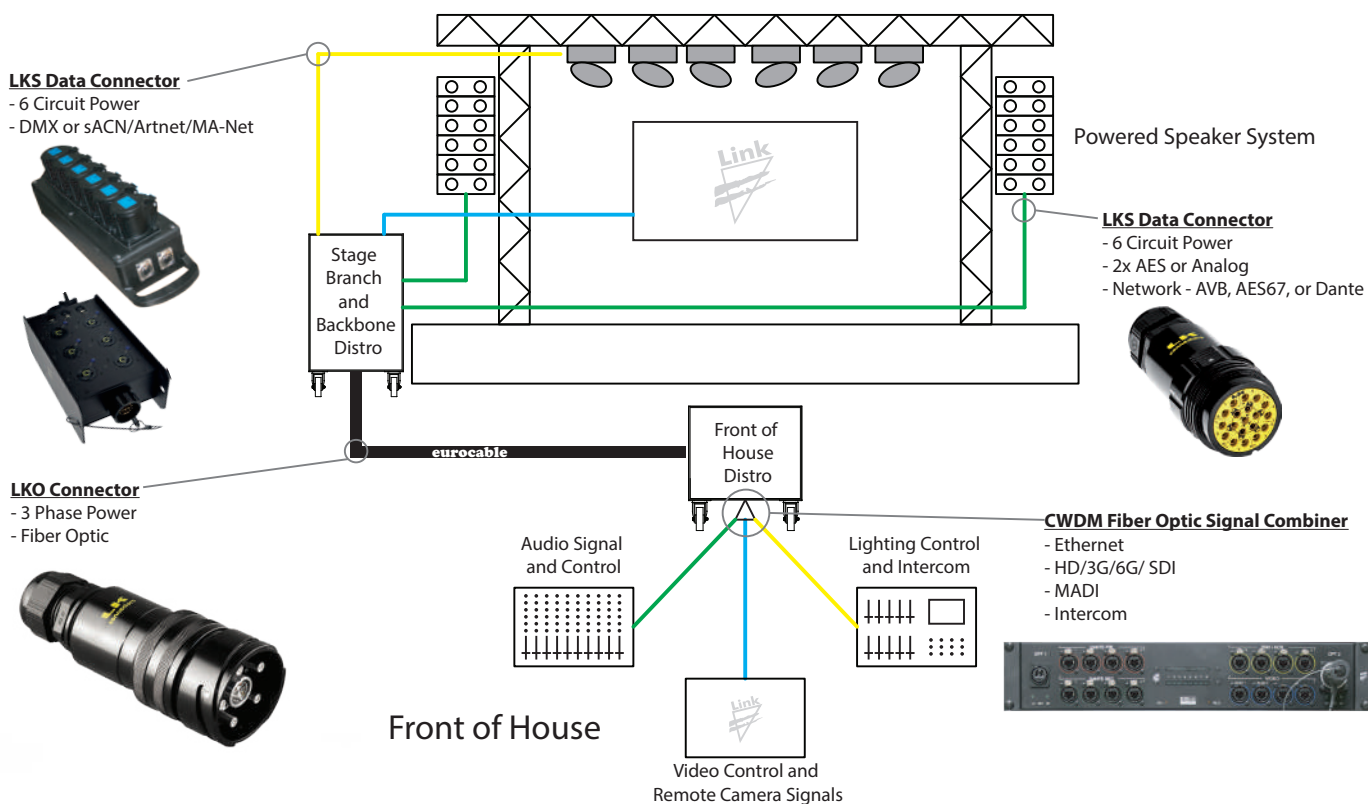

An Injector box integrates either a DMX splitter or network switch to distribute network and control on all the LKS Data breakouts. It is available for surface or rack mount, and both can be equipped with 2 or 4 smart connectors.

- Free standing robust portable enclosure to fit most 19" rack configurations
- 100% Magnetic / Hydraulic Breakers, unaffected by heat
- Web based monitoring and remote control options
- Modular flexible design
- Integrating power with audio, DMX, Ethernet, and video signals
- Durable, smear resistant power coat finish with high-contrast labeling
- Custom configurations available
- Advanced, and road proven mechanical and electrical design
- USA, European, MEA Configurations with Listings

EMEA Company switch

Link manufactures tailor made Company Switches up to 1000A in compliance with IEC/EN standards, for EMEA countries (IEC 61439-1-2). Link' Company Switches meet the specifications of the major "Design Companies" specialized in:

- Theatre
- Opera House
- Convention Center
- University
- Studios
- Theme Park
- Stadium
- Concert Hall
- Conference Center
- Multimedia Center

400A

Single pole receptacle:

- Powder coat finish
- Welded mounting tabs
- Steel 15/10 sheet
- Single pole (PowerLink) connection chamber
- Shunt trip segregation by connection chamber
- Indicator lights
- Laser labeling
- Colored and insertion guided single pole receptacle (Power Link)

Circuit Breaker:

- Rated current: 400A
- Rated operational voltage: 690Vac
- 3 poles
- Overload protection (Thermal)
- Short circuit protection (Magnetic)
- Short circuit protection (Magnetic)
- Compliance with international standards: IEC/EN 60947-2, UL489

250A

Single pole receptacle:

- 250A
- 600 VAC
- Powder coat finish
- Welded mounting tabs
- Steel 15/10 sheet
- Shunt trip segregation by connection chamber
- Indicator lights
- Laser labeling

Circuit Breaker:

- Rated current: 250A
- Rated operational voltage: 690Vac
- 3/4 pole version
- Overload protection (Thermal)
- Short circuit protection (Magnetic)
- Compliance with international standards: IEC 60947-2, UL489

Stainless Steel Outlet Box

Receptacle (CEE- PCE 345-6):

- 125A
- 380-480 Vac
- 4/5 pole version
- IP67 (available on request)

Circuit Breaker:

- Nominal current: 125A
- 4 Poles
- Compliance with international standards: IEC 60947-2, UL489

Facility Panels and Backboxes

Link's comprehensive range of Facility Panels and boxes allows you to configure complete connectivity and control solutions for any size venue. Whether your project requires simple single and double gang faceplates, or a more extensive stage manager station or control panel, our team of application engineers collaborates with your team to provide the optimal design for your venue. Multiple connectors, switch, and PCB components are available to ensure reliability and expedite installation.

We offer a wide range of box types, sizes, finishes, colors and labeling options, laser custom engraving, and silkscreening.

Link's facility panels have been deployed globally in:

- Auditoriums & Lecture Halls
- Theaters
- Broadcast Facilities
- Computer Classrooms
- Corporate Board Rooms
- Distance Learning Classrooms
- Network & Data Control Centers
- Presentation Rooms
- Residential Home Theaters
- Sound Masking Systems
- Stadiums & Arenas
- Video Conferencing Rooms

Specifiers and Integrators are invited to contact Link to receive standard templates, specifications, and .dwg libraries to accelerate your design process.

Portable Power Boxes

Purposely designed for mobile electrical distributions, these portable Power Boxes meet the majority of all electrical needs in an easy-to-carry Flight case. This equipment is manufactured using only high quality components and is available in 32A and 63A versions. They comply with IEC/EN regulations related to Power Boxes and are provided with IEC/EN declaration of conformity, test reports and instructions.

North America Power Distribution

PDlink is the next generation of power and signal distribution designed to deliver a truly unified and modular interconnection system. Leveraging decades of experience and innovation, Link combines LK connectors, **eurocable** hybrid signal and power cables to offer a unified line of 19" high density rack mounted units for power, data, audio, speaker, and video distribution.

Constructed with heavy duty, yet lightweight aluminium, the main and branch units support a number of standard configurations suited for amplifier, FOH, and video racks. The Socapex compatible 6 circuit units integrate seamlessly with your existing lighting distribution to easily extend power for peripheral equipment racks.

All PDlink breakers are magnetic/hydraulic rated for full load in the harshest of conditions. Panels are clearly labelled and can be custom labelled at a minimal additional cost.

Standard PDlink units are designed to perfectly integrate with the DGLink Ethernet and signal distribution systems and can also be custom designed on request. Contact us to learn about PDlink. It can be offered as an OEM solution, or designed for your specific touring needs.

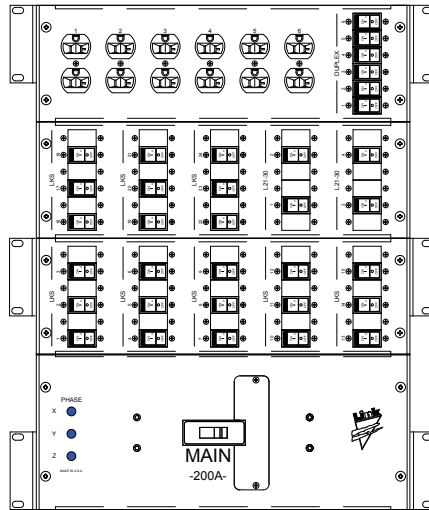

- Free standing robust portable enclosure to fit most 19" rack configurations
- 100% Magnetic / Hydraulic Breakers, unaffected by heat
- Web based monitoring and remote control options
- Modular flexible design
- Integrating power with audio, DMX, Ethernet, and video signals
- Durable, smear resistant power coat finish with high-contrast labeling
- Custom configurations available
- Advanced, and road proven mechanical and electrical design
- USA, European, MEA Configurations with Listings

PDlink Fixed Speed Chain Motor Control

PDlink Chain Motor Control is the culmination of years of real world development leveraging decades of experience and innovation. Working with our OEM partners Link combines LK Connectors, **eurocable** hybrid signal and power cables to offer a unified line of controllers whether you need 2 or 128 motors!

These units include advanced features such as the ability to sense and change the phase order remotely from the pendant by a certified operator with a key-switch. Additionally the control pendant features large, brightly lit up/down toggles, a highly flexible and durable **eurocable** control extension, and reliable analog controls that can be used up to 1500 feet.

Working closely with our OEM partner in addition to standard offerings we've also developed a specialty unit intended for large-scale rigging situations that is truss mountable into any size truss 12x12" and up, and features an LK Connectors LKH 28A-9 multipin allowing for 60 amps of total power; more than enough power to run 8x 2-ton motors simultaneously.

Standard PDlink Chain Motor Controllers units are available in a wide range of physical formats using a variety of power input options such as L21-30, "California Twist" 50 amp, the LKH 28A-9, connector and Cam-Locks. Output options include "dual twist" NEMA connectors, dual pin and sleeve connectors, and the industry standard P7, P14, and C7 multipins as part of our LKR series of connectors.

- Developed with leading entertainment rigging company
- Physical Formats Include Flight Cases, Truss Mountable, and "Suite Case"
- Multi-pin Power Inputs up to 80A allowing 8x 2-Ton Motors
- Use of Industry Standard LK Connectors for remotes and hoists
- Reliable Analog Remote Control with max distance over 1500 feet
- Large, bright up/down switches easily operated even with gloves on!
- Remote Phase Sense and Switch from pendant controller
- Easily Replaceable Mechanical Control Relays
- Installation Versions Available
- ETL Listed

GOLD & Custom Stage Boxes

SB Gold

SB Gold48, 56 and 64 channel Stage Boxes, have been purposely designed to satisfy the need of distributing signals in large venues.

Ideal when used with individually shielded multi-pair **eurocable** (e.g. 48, 56 and 64 pairs) on cable reels and with LK audio multi-pin connectors (e.g. 150 and 200 pins). These Stage Boxes, manufactured in 19" rack boxes, feature individual Ground Lift switches and are also available with passive splitters.

All the connector contacts used in the SB Gold Stage Box (XLR and LK multipin) are gold plated, to guarantee the maximum contact reliability. The HD 600 cable reel can store up to 100 meters of 48, 56 or 64 individually shielded **eurocable** pairs (the use of a Flight Case is strongly recommended).

Code

SB 48	Stage box 48 IN with GND lift (2 LK150)
SB 48/8	Stage box 48 IN; last 8 ch. in parallel with 8 male XLR; GND lift (2 LK150)
SB 48x8	Stage box 48 IN with GND lift + 8 OUT (2 LK200)
SB 56	Stage box 56 IN with GND lift (2 LK200)
SB 56/8	Stage box 56 IN; last 8 ch. in parallel with 8 male XLR; GND lift (2 LK200)
SB 56X8	Stage box 56 IN with GND lift + 8 OUT (2 LK200)
SB 64	Stage box 64 IN with GND lift (2 LK200)
SB 48X8 3	Stage box 48 IN with GND lift + 8 OUT (3 LK200)
SB 56X8 3	Stage box 56 IN with GND lift + 8 OUT (3 LK200)

Splitted version

SB 48 SPL	Stage box 48 IN with GND lift (2 LK150)
SB 48/8 SPL	Stage box 48 IN; last 8 ch. in parallel with 8 male XLR; GND lift (2 LK150)
SB 48X8 SPL	Stage box 48 IN with GND lift + 8 OUT (2 LK200)
SB 56 SPL	Stage box 56 IN with GND lift (2 LK200)
SB 56/8 SPL	Stage box 56 IN; last 8 ch. in parallel with 8 male XLR; GND lift (2 LK200)
SB 56X8 SPL	Stage box 56 IN GND lift + 8 OUT (2 LK200)
SB 64 SPL	Stage box 64 IN with GND lift (2 LK200)
SB 48X8 SPL 3	Stage box 48 IN with GND lift + 8 OUT (3 LK200)
SB 56X8 SPL 3	Stage boxes 56 IN with GND lift + 8 OUT (3 LK200)

SB Gold accessories

AV HD600	Steel cable reel, OD 600 mm, width 600
AV FS600	Cable restraining straps for HD600
FLY HD600	Fly case for HD600
FLY SB	Flight case for stage box

GOLD & Custom Stage Boxes

Custom Solutions

Link offers customized engraving on standard panels as well as fully customized panel construction and engraving services. Our application engineers directly work with our customers to design products directly from specifier or end user provided documentation. Submittal drawings will be provided for final approval prior to manufacturing. Our precision CNC machines, laser engraving and paint lines are capable of producing a single product or large quantities suited for your specific requirements.

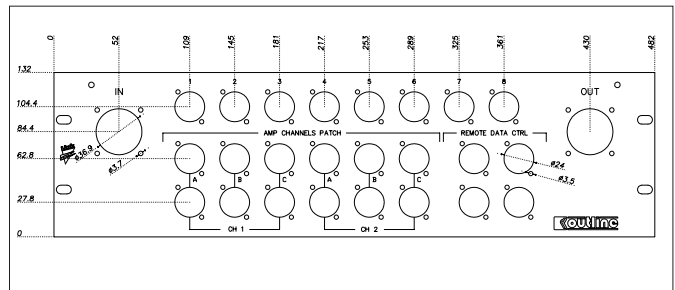

High precision engraving and fine painting

From scratch...

Step 1

Step 2

Step 3

When forwarding your drawings please remember:

- Panel dimensions.
- Height and cut out of the connectors.
- Writing and markings.

AD System

The modular concept of the AD Distribution System allows the assembly of Stage Boxes tailored to the customers' exact requirement providing an open system which is adaptable to future possible needs. With the basic elements such as the 8 channels INPUT and OUTPUT modules, AD Split and ADF multipin modules a wide range of configurations are obtainable. The internal connections with ribbon connectors and cables ensure maximum flexibility to the system, while the multipin LK connectors offer a perfect connection stability for decades.

AD OUTPUT Modules

The output module has eight male XLRs on the front panel and one 26 pin ribbon cable connector mounted on a PCB.

ADF Modules

ADF 2RU panels use the capability of the multi-pin LK range to connect from 8 up to 64 audio lines using only one cable. The 26 pin ribbon cable connectors allow XLR connections. They can be used for FOH, Monitor, REC, AUX or other connections, as well as Sub-snake boxes.

AD SPLIT

The AD SPLIT modules have been purposely engineered for highly professional applications. They provide a clean split signal thus maintaining the same quality in multiple outputs over long distances. Each Input channel is divided by the AD SPLIT module into 4 outputs, two are in physical parallel, with and without Ground disconnection (Ground Lift). The other two are individually split by high quality triple-shielded transformers. The Ground Lift switch on the AD 8 IN acts as "Switch out", providing Ground separation to the second parallel output (Direct Out) which can be used to assign the 48 Vdc Phantom power on each channel.

AD INPUT Modules

The standard input panels feature a Ground Lift switch for each channel and a further PCB (AD Link) connected on "Switch out" to set each channel in parallel to three ribbon cable connectors. The unit features a second ribbon exit called "Direct Out" dedicated to the mixer to assign the Phantom Power. The Ground Lift switch on the AD 8 IN acts only on "Switch out", providing Ground separation to the second output (Direct Out) which can be used to assign the 48 Vdc Phantom power on each channel. The input modules are available in two versions: the AD 8 IN and the AD 8 IN 8 J, with eight Combo connectors allowing XLR input (balanced signals) or a jack plug (unbalanced signals). The unbalanced signals are balanced by transformers.

AD Flat

The connection between the AD and ADF modules is made with ribbon extension cables. They are also available in different lengths on request.

AUDIO "SPLITTER" TRANSFORMER (TRIPLE FARADAY SHIELDS)

Compact & Modular Stage Boxes

Stage Box with LK panel male

The compact design and its raised bottom, simplify the use in narrow space allowing the cables to be gathered beneath it. The SB box mounts a LK multipin panel connector for an easy cable disconnection.

Stage box with fan out

The SBF range features SSA cable (individually shielded multi-pair **eurocable**) hard wired to the XLRs into the box and a XLRs fan out on the other end. The individual pairs are protected by Techflex to maintain ultimate flexibility. Use of coloured Techflex allows the easy identification of fan channels.

Stage Box with multipair extension

The SBS range features SSA cable (individually shielded multi-pair **eurocable**), permanently connected to the box with an LK multi-pin connector on the other end.

19" Box with LK panel male

The SP System permits separate IN & OUT channels (by 8 to 64) on Stage by running only one multi-pair cable on the long distance (Stage to Mix). The box is manufactured in 15/10 mild steel.

19" Box with fan out

The SBF range features SSA cable (individually shielded multi-pair **eurocable**) hard wired to the XLRs in the box and an XLRs fan on the other end (available in various input and output combinations). The individual pairs are protected by Techflex to maintain ultimate flexibility. Use of coloured Techflex allows the easy identification of fan channels.

19" Box with 2 LK panel male

The SP2 System is ideal for applications where two devices, generally, mixers are used. It features a second LK multipin chassis connector in parallel, to split and carry the audio lines to the Monitor Mixer (FOH, MON, REC, ...), like in the SP System.

Drive AMP I/O Systems

The Link Drive and Speaker Cable Distribution System combines several of our cutting edge products in a practical and easy to use system reflecting the company's philosophy to provide innovative and reliable wiring solutions. Manufactured with robust rack mounted interface boxes and specifically designed to terminate all audio drive lines, Ethernet and speaker outputs. Available also in active versions with AES/EBU splitters and/or Ethernet switches, the active Drive boxes can be designed to meet customer needs.

Decades of cooperation and partnership with the biggest speaker manufacturers, enables Link to be the worldwide reference point for wiring speaker systems, either active or passive, offering to the market the largest range of speaker cable and connectors (up to 24 pairs) designed also for Speaker Cable Distribution Systems.

Example featuring:

- LK 54 pin Input and Through connectors terminate to 8 audio pairs on the rear panel for amplifiers and 2 EtherCON connectors for data.
- 4 audio pairs terminate to the front panel for auxiliary connections.
- Speakon NL4 connectors on the rear panel terminate to one LKA 16 Pin Speaker Connector and two NL8 connectors to feed up to 8 independent loudspeaker channels.

eurocable 16N40 - Ultra Flexible 16 conductor Speaker Multi-Core

Specifically designed for the touring systems which use "Socapex" type connectors, the new LK16N40 16x4 mm² (+/- 11 AWG) multi-core respects the **eurocable** tradition of providing robustness and flexibility for portable applications while maintaining exceptional audio performances. Combined with the LKS 16 speaker connector, LK16N40 speaker cable offers stunning reliability and easy use.

eurocable SSAD12C2F Audio Multi-Core

Designed to transport audio and data signals featuring 12 individually jacketed shielded audio pairs with two integrated CAT6 UTP Ethernet cables for data and/or digital audio transmission.

The LK 54 multi-pin connectors ease connection between DRIVE I/O and AMP I/O easy.

Snake SNK-FNT-FNN

Snake SNK

All the extensions, Fan in (FNN) and Fan out (FNT) described here below can be used with AD Distribution systems and are assembled using individually shielded multipair **eurocable** and the multipin LK connectors range. The SNK extension range is terminated with LK multi-pin cable connectors on both ends, to enable the connection between the XLRs Fan out and the stage box.

Techflex

The use of the coloured Techflex allows the easy identification of the channels in the "Fan", easily extricates the XLRs Fan and improves its protection and flexibility. The unique braided construction and wide expandability allows quick and easy "Fan" sheathing. The range of colors allows easy and systematic color channel identification even in complex and crowded wiring. Techflex is braided from 10 mil polyethylene terephthalate monofilament yarns. The material has a wide operating temperature range, is resistant to chemical degradation, UV radiation, and abrasion. The sleeving cuts easily and cleanly with a hot knife and once installed, will beautify and protect any wire, hose or cable application.

Widget

Introducing Link's latest distribution solution, WidgetLink. Acting as "Swiss knives" for CAT5/6 cables, allows the standard Cat 5 and Cat 6 cabling to send multiple signals down a single cable thanks to a small range of Break-In, Break-out and adapters. The use of Cat 5/6 cable can be applied to DMX, Analog Audio, Balanced AES3 Digital Audio, and even hybrid combinations including 10/100 Ethernet.

1, 2, 3, or even 4 discrete signals can be sent down each individual Cat 5/6 cable. Shielded cable is required for applications using phantom power, 4 discrete signals, and/or hybrid combinations.

Thanks to its low loss characteristics, Cat 5/6 can increase the maximum length in many applications. For example, balanced AES3 signals have a typical distance limit of 100 meters on standard 110 ohm twisted-pair type cable, but can travel up to 300 meters on Cat5/6 cable, depending on the equipment being used. In a hybrid configuration, the maximum distance is dictated by the IEEE 802.3u Fast Ethernet standard. For DMX over Cat5/6 cable, distances of over 500 meters are possible, depending on equipment.

Link's **eurocable** brand is guaranteed to provide dependable signal integrity using our WidgetLink products, particularly when paired with our CVS LK CAT6A STP cable. Other hybrid solutions are also offered with various cable configurations. For example, our CVS LK 1CAT6SF 12/3 cable, which features a 12 AWG / 3 conductor power line with a shielded Cat 6 cable for "driveline" type applications.

- Multiple signals down a single Cat5/6 Cable
- Supports DMX, Analog Audio, and AES Digital Audio
- Hybrid solutions available including 10/100 Ethernet
- 4 total channels if using shielded cable
- "Fan," "barrel," and stage box type configurations
- Custom configurations available

Widget PCBs

The DB25 widget is an extremely cost-effective solution for break-ins and break-outs to XLR and even extensions using standard shielded Cat cables.

Stage Box

Hybrid Stage Box

Boxes and Panels

19" Boxes

19" boxes are the ideal base to build up your own easy-to-set audio or video power derivations. They are manufactured in 12/10 steel plate and finished in orange peel black dust epoxy. They are suitable for housing all kinds of 19" rack panels. All boxes are pre-punched for LK connectors. Punching is made on the connector size depending on the number of channels suitable for the specific box. This may be covered by an appropriate plate if not required.

19" Rack Boxes

The front and the rear panel are manufactured in 30/10 black finished aluminium plate; they are available in 1, 2 and 3 rack units consisting of a "U" shaped base and top lid. They can be supplied customized with pre-punched and laser labelled holes on the front and rear upon request.

Prepunched panels

Pre-punched panels are available in a wide range of size configurations for easy and time-saving assembly of various types of connectors (XLRs, CEE form sockets, LK connectors). They are manufactured in 15/10 steel plate and finished in smooth black dust epoxy with silkscreen identification.

Blank panels

Standard

These panels, featuring 19" standard rack size, are mostly used to cover empty units on the racks. Manufactured in 30/10 aluminium plate, they are finished in smooth, black dust, epoxy and can also be supplied customized with pre-punched and laser labeled holes upon request.

Reinforced

Similar characteristics of the standard panels but manufactured in 20/10 aluminium plate with a 90° fold, top and bottom, to give better rigidity. They are finished in smooth, black dust, epoxy can be also supplied customized with pre-punched and laser labeled holes upon request.

Ventilation panels

Specifically designed to give extra ventilation in the racks. They are manufactured in 20/10 aluminium plate finished in smooth, black dust, epoxy and have a 90° fold, top and bottom, to give better rigidity.

Blank and punched lids

Blank lids - finished in smooth, black dust, epoxy - are available for the entire range of LK connectors (PF2 L***) as well as blank lids and for BNC "D" series XLR adaptors (PF D, PF BNC, ...).

Boxes and Panels

19" Boxes

BOX P1 25	1U Stage box, punched for LK25
BOX P2 35 54	2U Stage box, punched for LK 37 and LK 54
BOX P3 85/150	3U Stage box, punched for LK 85 and LK 150
BOX P4 85/150	4U Stage box, punched for LK 85 and LK 150

19" Rack Boxes

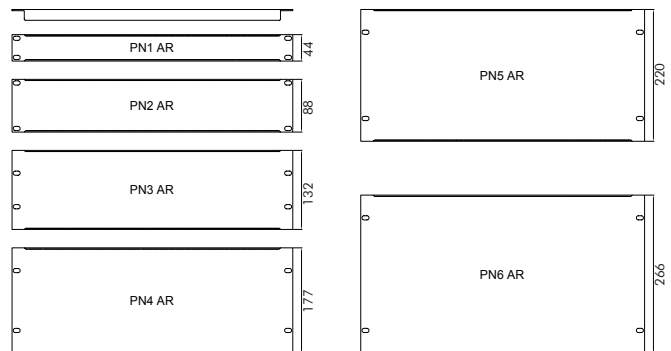

BOX R1D	1U Rack box, depth 170mm (BR 1BOXD+PB1A+PB1R)
BOX R2D	2U Rack box, depth 170mm (BR 2BOXD+PB2A+PB2R)
BOX R3D	3U Rack box, depth 170mm (BR 3BOXD+PB3A+PB3R)

19" Rack boxes can be supplied on request in different depth

Blank Panels

PN1 A	1U blank rack panel
PN2 A	2U blank rack panel
PN3 A	3U blank rack panel
PN4 A	4U blank rack panel
PN5 A	5U blank rack panel
PN6 A	6U blank rack panel
PN1 AR	1U reinforced blank rack panel
PN2 AR	2U reinforced blank rack panel
PN3 AR	3U reinforced blank rack panel
PN4 AR	4U reinforced blank rack panel
PN5 AR	5U reinforced blank rack panel
PN6 AR	6U reinforced blank rack panel

Ventilation panels

PN1 ARV	1U reinforced ventilation rack panel
PN2 ARV	2U reinforced ventilation rack panel
PN3 ARV	3U reinforced ventilation rack panel
PN3 AR3V	3U reinforced ventilation rack panel 3 slots

Prepunched panels

PF1 08T	1U prepunched panel for 8 XLR with T-bar
PF1 J08T	1U prepunched panel for 8 XLR + 8 Jacks with T-bar
PF1 12T	1U prepunched panel for 12 XLR with T-bar
PF1 16T	1U prepunched panel for 16 XLR with T-bar
PF2 L51925	2U prepunched panel for 5 LK 25
PF2 L43554	2U prepunched panel for 4 LK 37/54 and LKS 19 pins
PF2 L285	2U prepunched panel for 2 LK 85/150/200
PF2 GW	2U prepunched panel for 6 Gewiss 16A sockets
PF2 VI	2U prepunched panel for 24 Din module
PF3 VI	3U prepunched panel for 24 Din module
PF1V1X04	Prepunched AX 100 cable reel side panel for 4 XLR
PF1V2X12	Prepunched SP 380 cable reel side panel for 12 XLR
PF1V3X24	Prepunched SP 450 cable reel side panel for 24 XLR

Blank and punched lids

PF D	Blanking plate for D series punching
PF BNC	Adapter plate BNC - D series
PF BNC FP	Adapter plate BNC - solder
PF TP 19/25	Lid for LK 25 punching
PF TP 35/54	Lid for LK 37/54 punching
PF TP 85/150	Lid for LK 85/150/200 punching
